PROFILE

A qualified and professional Full Stack Developer with three years of experience in building and maintaining dynamic web applications. Possesses strong creative and analytical skills, with a proven track record across the entire development stack. Expert in leveraging modern technologies including React, Node.js, Express, and Laravel to deliver robust and user-centric software solutions.

SKILLS

- Proficiency in HTML, CSS, Typescript, and JavaScript.
- Proficiency in front-end frameworks such as React, TailwindCSS.
- Proficiency in Redux Toolkit for State Management.
- Proficiency in React Query for RECTful APIs.
- Proficiency in SOCKE.io for real-time Communication.
- Experience with Docker containerization.
- Experience in back-end development with Laravel ,Node js with express js.
- Experience in database management with SQLite.
- Experience in version control systems such as Git.
- Comfortable working in a collaborative team environment and communicating with other stakeholders.
- Experience in responsive design techniques.
- Strong Communication,Self Learning.
- DOM Manipulation.
- Open-Source Contributor.
- Proficiency in Programming Languages such as C++, Java.

PROJECT EXPERIENCE

School Management System

[dashboard and student web app](#)
[student mobile app](#)

- Led the backend development of a full-stack application designed to digitize school operations for students, teachers, and administrators.
- Engineered a scalable REST API with Node.js and Express, utilizing Mongoose to interact with a MongoDB database storing user and academic data..
- Implemented a secure authentication system using JWT and bcrypt for password hashing featuring role-based access control for three distinct user types.
- Developed RESTful APIs using Laravel for a delivery app, enabling users to buy products and drivers to deliver them.
- Developed key features including course management, dynamic gradebooks, and user profiles, ensuring efficient data flow to the Next.js frontend.

Delivery Application

- Technologies Used:Laravel and Flutter.
- Designed and optimized database schemas for products, orders, users, and drivers using SQLITE.
- Implemented secure authentication and authorization using Laravel Sanctum for users and drivers.
- Developed RESTful APIs using Laravel for a delivery app, enabling users to buy products and drivers to deliver them.
- Built middleware for role-based access control (RBAC) to restrict access to user, and driver endpoints.
- Collaborated with frontend developers to ensure seamless integration of APIs with the Flutter mobile .

OBJECTIVE

Seeking a challenging Full Stack Developer role to utilize and enhance my expertise in React, Node.js, Express, and Laravel. Aiming to contribute to a dynamic team by developing high-quality software, with a strong foundation in creative solution design and analytical problem-solving gained over three years in web development.
